SUMMARY

Backend software developer with experience delivering production systems in regulated banking and insurance domains. Strong in Java and Kotlin on Quarkus and Spring Boot microservices, with hands-on work across the full lifecycle of customer-facing financial products — from API design through integration with core banking, payment, and KYC systems. Comfortable navigating legacy estates and regulatory constraints, and committed to clean, well-tested, maintainable code.

EXPERIENCE

Java Developer

Feb 2024 – present

Escode (contracted to Citadele Bank)

Riga, Latvia

- Currently developing core banking integration and contributing to REST API implementation for a new subscription-based banking product
- Contributed to the in-app account opening feature, adapting an existing Internet Bank onboarding solution to the mobile channel
- Designed and implemented the backend API for a new piggy bank savings product
- Delivered REST APIs across multiple mobile banking domains - insurance, accounts, loans, and leases - collaborating with mobile and integration teams on contract design
- Migrated legacy servlet-based endpoints to RESTful APIs, reducing maintenance overhead and aligning the estate with the bank's current architectural standards
- Built a feature-flag management page in the internal JSP-based configuration tool, enabling business and operations users to toggle mobile app features per platform (iOS/Android) and app version

Software Developer

Aug 2021 – Feb 2024

C.T.Co

Riga, Latvia

- Designed BPMN process flows and implemented Kotlin task handlers as part of a *Camunda* process engine integration
- Implemented a conversational sales flow in the chat engine for three insurance products (House, Contents, Liability), integrating with the insurer's quoting and policy issuance APIs
- Designed and implemented integrations with multiple third-party REST APIs across the insurance and CRM domains
- Delivered features and bug fixes across a distributed-monolith estate of around 27 Kotlin modules

Junior Software Developer

April 2020 – Aug 2021

C.T.Co

Riga, Latvia

- Performed the migration of multiple modules from *Thorntail* and *Spring Boot* frameworks to *Quarkus*
- Contributed to the project migration from Java to Kotlin and from Java 11 to Java 17
- Expanded test coverage for 10+ modules to at least 80%

Junior IT Solutions Developer

Oct 2019 – April 2020

SEB Global Services

Riga, Latvia

- Analyzed and improved configuration management documentation
- Refactored and improved test coverage for multiple modules with 10k+ lines of code, significantly enhancing maintainability.
- Collaborated closely with *Calypso* platform users and business analysts

EDUCATION

RISEBA University

Bachelor's degree in Business Studies

Riga, Latvia

Sep. 2001 – May 2007

TECHNICAL SKILLS

Languages: Java, Kotlin, SQL

Frameworks: Quarkus, Spring Boot, JUnit, Mockito, Mockito Kotlin, Hibernate, JDBC, Cucumber

Databases: PostgreSQL, Oracle DB

Developer Tools: Git, Maven, Gradle, Liquibase, Apache Velocity, StringTemplate

CI/CD and Cloud: Jenkins, Azure, Docker, Kubernetes

AI Tools: Claude Code, Claude (claude.ai) — daily use for development, code review, and technical research

LANGUAGES

English: Professional working proficiency

Latvian: Limited working proficiency

Russian: Native
